

Merry Christmas & a Happy New Year

Union News

NZ Meat industry will celebrate 125 years of refrigerated exports in early 2007. It is of little surprise that those that do the hard miles in the "blood & guts" have not warranted consideration or representation at the celebrations. In the past 6 years beef and lamb returns at the farm gate have been among the highest ever recorded during the 125-year history. Meat company profits are high, taking into account premiums paid to farmer suppliers & dividends paid to

Your Union successfully negotiated good settlements in this 2006 collective employment Agreement Round

There are reasons why we were able to achieve good settlements:-

1. Low unemployment
2. The volume of meat exported per person employed has risen from 23 tonnes in 1980 to 37 tonnes today - a productivity gain of 61%
3. High productivity by meat workers
 - ✓ Heavier animals
 - ✓ More stock slaughtered with less workers
 - ✓ Longer hours of work
4. High overseas prices and a lower \$NZ dollar for most of year

NEWSFLASH - At this time, the Affco plant at Manawatu is closed. The workers have been told that they can return to work if they sign a new Plant Agreement to process more cattle for less pay. The Union believes that this is a lockout, and we are about to file urgent proceedings in relation to that issue.
